

## ANL 020/202 only cooling

HFC  
Refrigerant  
R410A

Aermec participates in the EUROVENT Certification Programme: LCP. The products concerned appear in the EUROVENT site [www.eurovent-certification.com](http://www.eurovent-certification.com).

chillers, and condensing units  
Air/Water for outdoor installation  
Axial fan and scroll compressor:  
Cooling capacity 5,65÷43,70kW

- **STANDARD VERSION**
- **VERSION WITH BUILT-IN HYDRONIC KIT**

### Characteristics

Chillers for external installation for chilled water production with high performance scroll compressors and low electric absorption, axial fans, external copper coils with aluminum fins (from size 020 to 090) micro-channel (from size 102 to 202), plate heat exchangers. In the units (with desuperheater or total recovery) it is also possible to produce free-hot water. The basement, the structure and the panelling are in steel treated with polyester anti-corrosion paints.

#### Versions

**ANL\_°:** Chillers without hydronic kit  
**ANL C:** Condensing unit

#### Versions with hydronic kit

**ANL\_P:** with standard pump  
**ANL\_N:** with high pump  
**ANL\_A:** with buffer tank and standard pump  
**ANL\_Q:** with buffer tank and high pump

#### Operational limits

Work at full load up to 46°C external air temperature, with options to produced water up to -10°C (for more details please refer to the technical documentation)

- High efficiency scroll compressors with low power input
- flow switch/ pressure switch as standard supply

- Water filter
- High efficiency heat exchangers
- Axial flow fan units for extremely quiet operation
- Possibility of integrated hydronic-kit, which includes the main hydraulic components; it is available in different configurations with or without buffer tank, one high or low head pumps.
- Electronic controller (Modu\_control)

### Accessories

- **MODU-485BL:** RS-485 interface for supervision systems with MODBUS protocol.
- **MULTICONTROL:** Allows the simultaneous control of several chillers or heat pumps (up to 4) fitted with our MODUCONTROL controller and installed in the same hydraulic system. For complete control the following accessories are available:  
**SPLW: System water temperature sensor.** In most cases the loose supplied sensors for each chiller/heat pump are sufficient. In cases of a common flow/return header this sensor can be used to control the common system supply water temperature for the chillers connected to the header, or it can be used for temperature monitoring.

#### VMF-CRP to predict accessory for the management of the probes SPLW / SDHW if provided with the MULTICONTROL

- **PR3:** Simplified remote panel. Permits control of the basic unit functions (on/off and change of operating mode, diagnostics and alarm reset). Maximum distance permitted is 150 m with screened cable.
- **DCPX:** an speed controller allowing operation in cooling mode within an external temperature range from +20 °C to -10 °C;
- **Standard for the version with desuperheater**
- **VT:** Anti-vibration mounts.

#### Accessories factory fitted only

- **DRE:** Electronic soft starter device reducing starting current by about 30%
- **KR:** Anti-freeze electric heater for the plate heat exchanger, not available for sizes 020A-HA to 040A-HA.
- **KRB:** Electric anti-freeze heater for the base. Prevents the formation of ice on the base.
- **RA:** Anti-freeze electric heater for the buffer tank.

#### Compatibility with the VMF system

For further system information please refer to the specific documentation.

**Accessory compatibility**

(2) Only for power supply 400V/3N/50Hz

## Unit Configurator

By suitably combining the numerous options available it is possible to configure each model in such a way as to meet the most particular of system requirements.

<b>Field</b>	<b>Code</b>
<b>1,2,3</b>	ANL
<b>4,5,6</b>	<b>Size</b> 020-025-030-040-050-070-080-090-102-152-202
<b>7</b>	<b>Model</b> ° Only cooling
<b>8</b>	<b>Version</b> ° Standard <b>P</b> With pumps <b>N</b> With high pump (for size from 102 to 202) <b>A</b> With buffer tank and standard pump <b>Q</b> With buffer tank and high pump (for size from 050 to 202)
<b>9</b>	<b>Heat recovery</b> ° Without recovery <b>D</b> With desuperheater (4)
<b>10</b>	<b>Coil fin (5)</b> ° Aluminium <b>R</b> Copper <b>S</b> Tinned copper <b>V</b> Treated aluminium
<b>11</b>	<b>Field of use</b> ° Standard (leaving water temperature down to 4°C) <b>Z</b> Low leaving liquid (from 4°C down to up to 0°C) <b>Y</b> Low leaving liquid (from 0°C down to -6°C)
<b>12</b>	<b>Evaporator</b> ° Standatd <b>C</b> Condensing unit
<b>13</b>	<b>Power supply</b> <b>M</b> 230V/1/50Hz (for size from 020 to 040) ° 400V/3N/50Hz (for size from 020 to 202)

(4) The desuperheater is available for sizes from 050 to 090 only with buffer tank, whilst sizes from 102 to 202 are available in all versions. Desuperheater is incompatible with the low temperature options, with the condensing unit version, and for dimensional reasons even with the option Q.

**(5) Coil fin options**

° Aluminium

**R e S Only cooling model:** only available for sizes 030-090; for sizes 020-025 treatment "R and S" is replaced by cataphoresis treatment

**V Cataphoresis treatment Cooling only available only for sizes 020 ÷ 025 and 102 ÷ 202;**

**Epoxy paint for models 020 ÷ 090**
